

## Farm with feather&PECK eggs

- **Are you looking to diversify your farming income streams?**
- **Turbo charge your regenerative farming efforts by adding Hy-line hens to your farm enterprise to produce pasture raised eggs.**
- **Join a collaboration of SA regenerative farmers**

### What Feather&PECK does:

- Provides a regular income stream by purchasing and picking up all useable eggs under a 5-year contract
- Provides proven methodology, training, troubleshooting support, systems know-how and knowledge base
- Includes you in a collaborative regenerative farmer ecosystem with specialist support (hen welfare and nutrition)

### What the farmer does:

- Purchase of mobile vans and feeders - all infrastructure is mobile with strong resale value
- Small coolroom (10 degrees) and feed silo or field bin
- Purchase of Hyline pullets
- Farm pasture raised hens including
  - egg collection
  - shifting vans weekly
  - managing water and feed and
  - monitoring hen welfare

### Regenerative farming benefits:

- Improve your soil health through natural fertilisation and carbon sequestration
- Improve other farm enterprises
- Better water retention
- Low-density farming under 150 hens per hectare
- Documented pasture raised hen management processes
